Python Interview Preparation

Questions 1–21 | 3 Days / 21 Questions

Day 1 — 05 September 2026 | Python Basics

1. What is python ? why u learn python ?
2. Applications of python?
3. Features of python ?
4. Difference between compiler and interpreter?
5. Explain about input() function?
6. What is list in python ? How do you create list?
7. What is tuple in python and how do you create tuple?

Day 2 — 06 September 2026 | Data Types & Basic Python Concepts

8. What is a set in python and how it is differ from a list?
9. What is dictionary in python?
10. What is string in python ? How do you create?
11. What is boolean values in python?
12. Define immutable data types in python?
13. What is the purpose of the print()?
14. What are comments important in python?

Day 3 — 07 September 2026 | Variables & Operators

15. Difference between int,float,str data types in python?
16. Why should you avoid using python keywords as variable names?
17. Describe the rules for creating variables in python?
18. What is the purpose of the id() function?
19. What is the base and exponent in exponention?
20. Difference between division (/) and floor division(//) ?
21. What are the basic arthmetic operators in python and how do they function?

Python Interview Preparation

Questions 22–42 | 3 Days / 21 Questions

Day 4 — 08 September 2026 | Variables & Operators

22. What are comparision operators in python?
23. What are identity operators in python?
24. Describe membership operator in python with example?
25. What are bitwise operators in python?
26. Explain the difference between == and is ?
27. What is the purpose of conditional statements in python?
28. How does indentation used in python , especially in the context of conditional statements?

Day 5 — 09 September 2026 | Conditional Statements

29. How do you write if-else statement and when is it used?
30. Explain the if-elif-else structutre with example?
31. What is the nested if statement and when would you see it?
32. Explain the difference between if and elif statements?
33. Can u use multiple elif statements?
34. What are the main types of loops in python? Describe each one?
35. Explain the use of the range() function in python?

Day 6 — 10 September 2026 | Loops

36. What is the nested loop ? provide the example?
37. What is the difference between for loop and while loop?
38. What is the difference between pass and continue?
39. What is difference between break and continue?
40. Explain indexing and slicing in python lists?
41. How can u skip characters while slicing a list?
42. Explain the difference between append() and extend() in python lists?

Python Interview Preparation

Questions 43–63 | 3 Days / 21 Questions

Day 7 — 11 September 2026 | Lists

43. What does the copy() method do? is it shallow copy or deep copy?
44. How does the clear() method differ from the remove() and pop()?
45. What is difference between append() and insert()?
46. How do u find the index of an element in a list?
47. How do you remove duplicates from list?
48. How does indexing works in python?
49. What does count() do in python?

Day 8 — 12 September 2026 | Strings

50. How do you convert a string into uppercase and lowercase?
51. Explain the use of strip() method?
52. How do you split() a string into a list and join a list into a string?
53. How do you reverse a string?
54. Difference between find() and index()?
55. Difference between replace() and strip()?
56. What is the difference between upper(),lower(),title(),capitalize()?

Day 9 — 13 September 2026 | Strings

57. What is the difference between isalpha() , isdigit() and isalnum()?
58. How do you check whether a string is palindrome?
59. How do you create a dict in python?
60. How can access a value in a dict?
61. How do you add a new key-value pair in dict?
62. How can u remove a key-value pair from a dict?
63. How do u check if a key exists in a dict?

Python Interview Preparation

Questions 64–84 | 3 Days / 21 Questions

Day 10 — 14 September 2026 | Dictionaries

64. How can u iterate over the key - value in a dict?
65. What is the difference between dict.keys() and dict.values()?
66. How do you merge two dictionaries?
67. How do you create a dict from two lists , where one list is keys and another list is values?
68. Why do u use dictionary?
69. What is the difference between get() and [ ] ?
70. How do update an existing value?

Day 11 — 15 September 2026 | Dictionaries

71. Why cant we use a list as a dictionary?
72. What are the key characteristics of sets in python?
73. How do you add an element to a set?
74. How do you remove an element from a set?
75. What is the difference between remove() and discard() methods?
76. How do you find union of two sets?
77. How do you find intersection of two sets?

Day 12 — 16 September 2026 | Sets

78. How do you find difference between two sets?
79. How do you find symmetric difference between two sets?
80. Can u explain the use of set comphresions in python?
81. How can u check if two sets are disjoint?
82. How can u check if a set is a subset of another set?
83. How can u check if a set is a superset of another set?
84. What is the frozen set in python and how is it different from a regular set?

Python Interview Preparation

Questions 85–104 | 3 Days / 21 Questions

Day 13 — 17 September 2026 | Tuples

85. What is the characteristics of tuple?
86. What is the difference between tuple and list?
87. Why tuples are immutable?
88. Can a tuple contain duplicate elements?
89. What is function in python?
90. Why do we use functions in python?
91. How do you define and call a function?

Day 14 — 18 September 2026 | Functions

92. What are parameters and arguments?
93. What is the difference between return and print() ?
94. What happens if a function does not have a return statement?
95. What are the different types of arguments in python?
96. What are positional arguments?
97. What are keyword arguments?
98. What is *args?

Day 15 — 19 September 2026 | Functions

99. What is **kwargs?
100. What is variable scope in function?
101. What is the difference between *args and **kwargs?
102. What is the difference between local variable and global variable?
103. Can we modify a global variable inside a function?
104. Can a function return multiple values?
